BRAND STATEMENT

A web developer with a passion to make ideas into reality, I decided to immerse myself in web development to turn this interest into a reality. Tackling challenges and solving problems in unique ways continues to make me a better developer. I'm an open person and take feedback from others as a good thing. I use it to grow and develop as a person.

SKILLS

HTML | CSS | Javascript | jQuery | Adobe Photoshop | Adobe Lightroom | PostgreSQL | Git | ReactJs | Node | Ruby | Ruby on Rails | FlexBox | React-Native | Vue.js | Express

PROJECTS

- **Splat !** - Splat is a Javascript game that allows two players to battle each other. The objective of the game is to splat Donald Trump's face with your color and connect 4 colors in a row. The first person to splat Donald Trump's face 4 in a row with your color wins!
- **What's Your Gym** - What's Your Gym is a Node app that uses Yelp API to allow clients to find local gyms around their area or current location and go for a nice workout. This web app is very useful for people out of state or someone who isn't familiar with the surrounds and need a little help locating gyms in the area.
- **GitHired** - GitHired is a Ruby on Rails based web app that uses Github job API and allows us web developers to search for jobs in a certain areas and you can also specify their desired language.

EXPERIENCE

General Assembly, New York, NY - *Web Development Immersive*

MAY 2017 - AUGUST 2017

- At General Assembly, I was a student in the Web Development Immersive. In this class I learned to pick up on new languages, and use their potential through homeworks and mini projects. It showed me that the more I keep at a language, the more familiar it becomes, and I am able to excel and create great projects.

EDUCATION

General Assembly, New York, NY - *Web Development Immersive*
